

K-Ter Imagineering Inc.

An Employee Owned Corporation

Nail Hole Punch

- Quick change change units are easily removed from the machine for safe servicing off line
- Can be a free standing machine, or to conserve space, the assembly can be mounted on a K-Ter puller
- Having an additional unit set up in advance, eliminates down time on the line for service or product changes
- Uses one piece high wear punch and indexable carbide die sections
- Standard duty, two post and heavy duty, four post models are built to provide long life and accuracy
- Two separate units can be mounted to the same puller for punching Quad Accessories
