

Water Dip Cooling System

- Reduces jam ups & down time
- Temperature changes are instant
- Even temperature across the sheet
- Higher speed potential
- Less maintenance than cooling rolls
- Works with PVC, ASA, or Acrylic cap materials
- Mounts on existing embossing stands
- Supports Vision Inspection systems

What is a Water Dip Cooling System?

- Revolutionary patented method of cooling
- Exceeds cooling roll capabilities
- Proven to run faster, increasing productivity
- Running 10 ft/min faster will increase production 4 million feet annually
- Costs justifies itself in weeks
