An Employee Owned Corporation

Cooling Rolls

- Cool the material in a controlled fashion
- Cooling Rolls are available in sizes ranging from 12" to 16" in diameter
- Rolls can be mounted with bearings on both ends or cantilevered for easy line string up
- Cooling Roll assemblies mount to either of the K-Ter embossing machines
- Two and four roll assemblies are available
- One smaller roll before and one after the big rolls provide additional wrap by holding the material up against the big rolls longer and holding the material at the correct height to go on into the sizing fixture
- For safety, the drive has a slip clutch built in and the water lines have pressure relief valves in line
- The rolls are made of aluminum for high heat transfer and anodized
- All electrical controls are included
- All water plumbing, rotary unions, pressure gauges and temperature gauges are included.
